Solarix MP Series

1/2/3/5 kW

SOLAR INVERTER

Pure sinewave output

Full compatibility with all kinds of electrical devices, the ideal solution for your critical applications.

Wide input voltage range (90-280 VAC)

The ability to work online in electrical household appliances at voltages between 90-280VAC, in computer applications at voltages between 170-280VAC without switching to the battery.

Intelligent charging technology for optimal battery performance

Since Solarix solar inverters charge the battery with a 3-step battery charging algorithm, they extend the battery life, reduce your operating costs, and provide savings.

High performance microprocessor

Thanks to the digital structure and high speed of the CPU-controlled control board, it provides full protection by performing the protection functions of the Solar Inverter such as overload, short circuit, low-high voltage and over-temperature in a timely manner, thus ensuring that the Solar Inverter has a stable and reliable structure.

RS-232 & USB communication port

To allow for unattended Solar Inverter to shutdown/start-up and status monitoring, connect the communication cable one end to the USB/RS-232 port and the other to the communication port of your PC. With the monitoring software installed, you can schedule Solar Inverter shutdown/start-up and monitor Solar Inverter status through.

MPPT

Solarix MP Series 1/2/3 kVA solar inverters have built-in 40A MPPT charger, 3/5 kVA solar inverters have built-in 60A MPPT charger.
